IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application.

Claim 1 (Currently amended): In a load handling crane for transport of containers between receiving and delivery locations, the improvement residing in: at least two non-pivotal trolleys onto which the containers are positioned; rail means for guiding simultaneous movement of the trolleys between said locations passing each other along vertically spaced travel paths to effect said transport of the containers; and wheeled frame means for support of the rail means; ~~and cable means fixedly anchored to the frame means for exclusively suspending the rail means therefrom.~~

Claim 2 (Previously presented): The load handling crane as defined in claim 1, wherein said rails means comprises: a boom having a pair of laterally spaced upper rail tracks establishing one of said travel paths and a pair of laterally spaced lower rail tracks establishing the other of the travel paths, said wheeled frame means supporting the boom extending in a horizontal position between said receiving and delivery locations.

Claim 3 (Currently amended): The load handling crane as defined in claim 2, wherein said wheeled frame means includes: laterally spaced legs having lower and upper ends between which the boom extends; ~~said~~ and cable means interconnecting the boom with the upper
